Picture book

Ninereeds begins a bounded instructional greeting and identity-verification chain with Taro. The chain's persistent goal is to establish and verify Ninereeds's stable identity across the later interlocutor transition. Pages 01-04 establish the greeting and identity exchange with Taro; page 04 affirmatively confirms Ninereeds but has no meeting-close form, so the identity-verification chain remains open. At page 05 the visible scene changes to a full Ninereeds-Emma pair, and Emma advances the same unresolved goal by rejecting Taro as Ninereeds's identity, requesting self-identification, and offering an Emma-or-Ninereeds discrimination. The ordered two-person scenes carry one persistent identity event across the transition. Page 08 is the sole resolution: Emma says 'Nice to meet you.' and Ninereeds says 'Nice to meet you, too.'. The bounded identity-verification chain stops with Ninereeds and Emma as the visible pair.

Teaching controls and stop conditions

Luna may choose only from this protocol-level tool set during rehearsal. A tool remains unusable unless the lesson and rehearsal specification license it for the current exercise.

SHOW_ASSET	Show a prepared lesson asset.
SHOW_CROP	Show a precomputed literal crop; never generate one live.
SHOW_HIGHLIGHT	Show a prepared context-preserving highlight.
REPLAY_PRESENTATION	Replay the frozen presentation within budget.
ASK_BOUNDED_CLARIFICATION	Ask one licensed clarification question.
CHECK_UNDERSTANDING	Check whether teacher wording and focus were understood.
PRESENT_AGAIN	Replay only the licensed frozen presentation item, within its use budget, then cold-retest the gate.
TRAIN_MORE	Add one bounded Point-safe example using frozen reviewed assets and log the decision basis.
TRAIN_LONGER	Run a bounded varied ordering of frozen mixed-practice items and log the stop count.
REPLAY_LESSON	Replay the frozen lesson at most as licensed; never create new material live.
FINISH	Close the lesson and write the report; issue no further learner prompts.
ALARM	Freeze immediately when the lesson, visual, language, or protocol is unsafe or inadequate.

Operator review questions

1. Is it always obvious what Ninereeds should look at?
2. Is every teacher sentence understandable at the evidenced level?
3. Do affirmative, negative, W-question, and OR-question forms stay separate before mixing?
4. Are answer contracts and feedback unambiguous?
5. Can Luna recover using only licensed tools?
6. Is every stop or alarm condition explicit?
